Learning for Earning and Living at Tri-State College

T

A Tri-State Survey

There should be, behind any project, an express purpose which justifies the result. As the graduating class we have done this for ourselves. During our stay on this campus we have lived these scenes and in living them we have preserved in our memories the joys, sadness, friendships and associations, work and accomplishments that have been our experiences.

Time may cause some of these memories to fade. When this should happen our pleasure will be increased as we leaf through these pages from our lives.

TRI-STATE COLLEGE ANGOLA, IND. 1884

1941

MODULUS

Summary of

Allen County Public Library
900 Webster Street
PO Box 2270
Fort Wayne, IN 46801-2270

Our education would not be complete without some experience of a social nature. It provides lessons in making friends and affords us the necessary relaxation from our studies. The symbols below are representative of fraternities which play an important part in shaping our social life at school and after.

These school implements symbolize our major interests at school and are thoroughly explained in the pages that follow.

Survey

Many phases of extra-curricular work can be noted in the pictures below. These organizations give us something to aim for and, when acquired, something to be proud of.

The body as well as the mind and spirit need training. Therefore each of us find pleasure and relaxation in some form of athletics.

Surveying the Campus

Many are the times we have walked, yes, and ran too, through these scenes depicted here. Now they are so close to us we fail to notice that we have become a part of them. Every student who attends a class on the campus leaves a mark or impression. Yes, a world is shaped by the people of whom it is composed. This has been our temporary world and in future years we will look back and remember and know that this world also left its mark on us.

Administration building as spring gets into swing. A thing of beauty at any time but glorious now.

Look. Now it's winter and we trudge through slush and snow to make our classes.

More Scenes

This looks barren, doesn't it? There are really very few times during the day that the campus appears deserted, so this is one to be remembered.

The campus in the spring, summer, or fall is one of the beauty spots of the town. These scenes will always be familiar to those men who pass them.

Prof. Wm. A. Pfeifer
E.E., M.S.

To Professor William A. Pfeifer, Head of the Engineering Department of Tri-State College, this book is fondly dedicated.

Although there is no one more deserving of a title, Professor Pfeifer is never the less known to all as just "Bill". It is his simple, good natured and sincere character that has won him so many friends. Never refusing a helping hand or a guiding smile to those in need, he has given more to all concerned than can possibly be expressed in this dedication.

The graduating class of '41 dedicates this book to Professor William A. Pfeifer, Head of the Engineering Department of Tri-State College.

3 1833 02553 0913

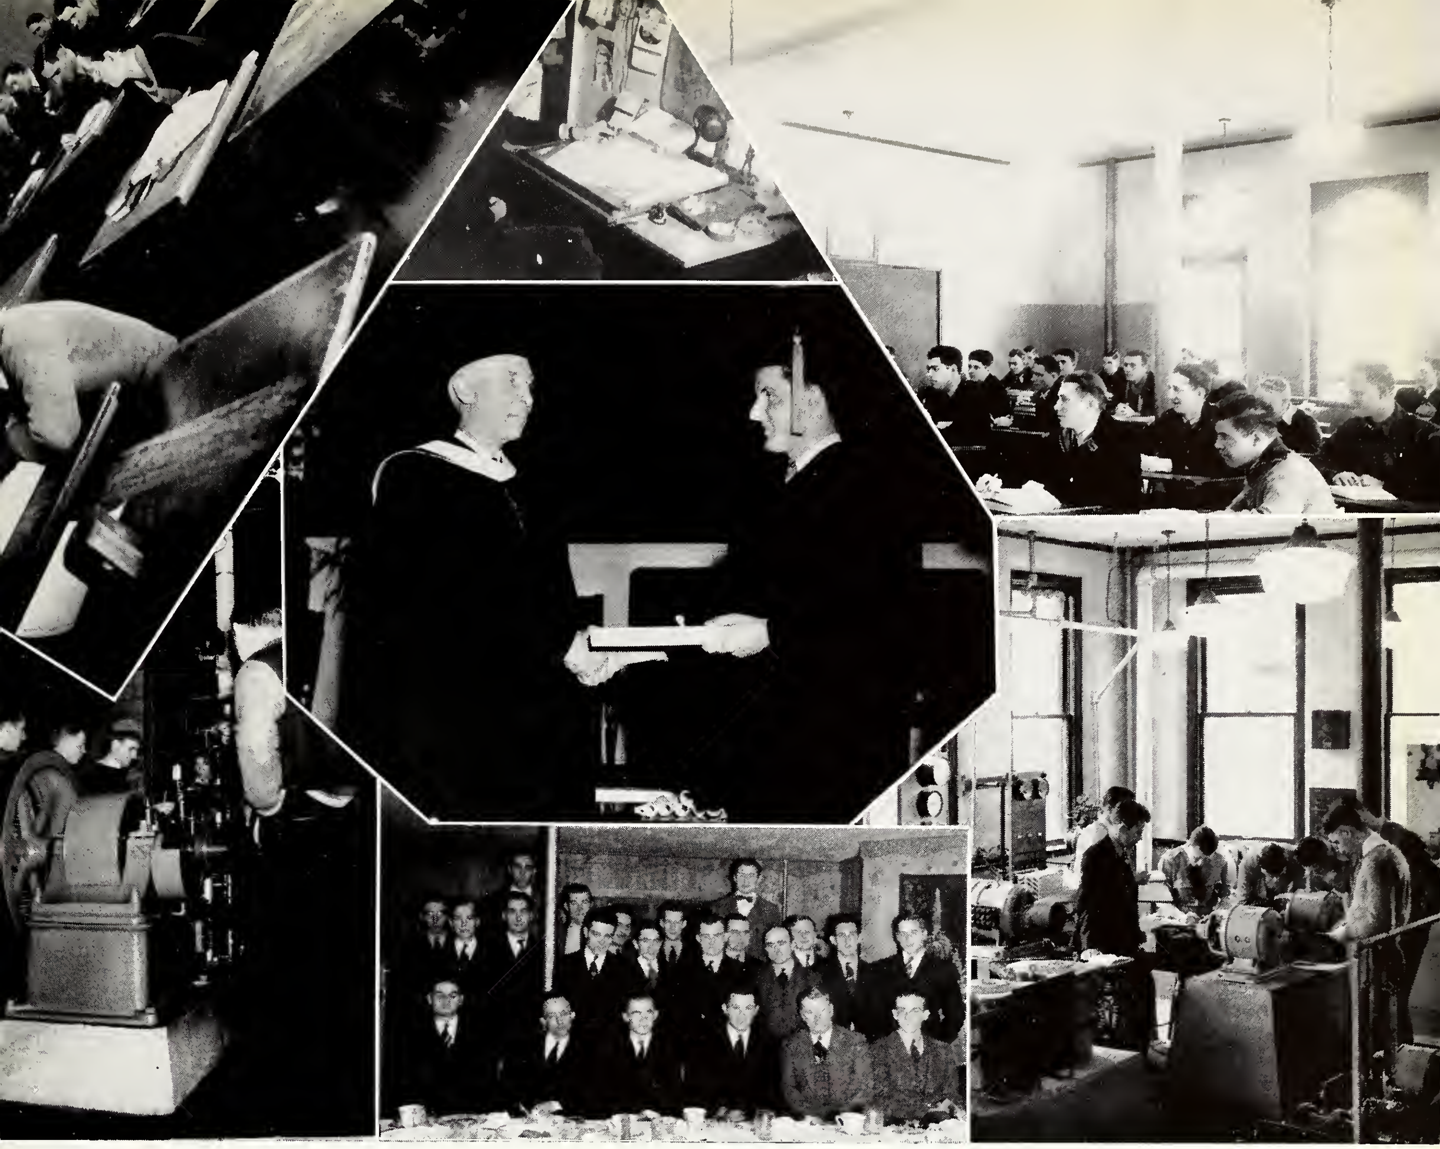
Listen! the President

Perhaps at no time in history has a graduating class finished its work ready to go out into business and industry at a more momentous period. With the world in flames and millions of men striving to kill each other it is a most difficult matter for any young person to retain his sanity and preserve a normal outlook. The dislocation of the normal processes of life as we have known them are such that it creates uncertainty and fear of the future. However, the technical graduate of 1941 is fortunate in that he has an opportunity to contribute to the development of the defense program of his country in its various phases and at the same time enter into the line of work in which he is interested and for which he is trained. The graduates of Tri-State College for this year are all of this class. We hope that each one of them may proceed to find his place in present day affairs to the end that he may contribute in the highest degree to the completion of the task which has been begun.

PROFESSOR BURTON
H. HANDY
A.B.; A.M.

This section is devoted to activities of primary importance to every student.

Of the



School

PROFESSOR HANDY
Chairman of Board

The Board of Directors

Perhaps the least evident of all the organizations in the school is the Board of Directors. Many of us never come in contact with this board and therefore seldom think of its existence. That does not mean, however, that these men are not actively engaged in the business of the school. In fact it is this board that directs the policies of the school.

Each man on this board is a graduate of Tri-State and has spent the greater part of his life in constant association with the school.

For this reason they are undoubtedly more sincerely interested in the welfare of the school than any others. The policies adopted and carried out by this board are designed to further the interests of the school and therefore the students.

These men are greatly respected by all who have been associated with them in any way. To them a great deal of credit is due for their work in behalf of the school.

Beauty at Work

Many are the duties imposed upon the office staff. In addition to handling the regular business of the college, they are often called upon to perform special duties for the convenience of the students. Their readiness to comply to these requests for their services deserves the gratitude of all students on the campus.

The school would not be the same without Marge and Katie in the College Book Store.

Class Officers

Life can be beautiful. Surely this is an inspiring philosophy. However, in today's perplexing era these words to many of us are only figurative and idealistic. Often we ask how happiness can be secured in our civilization of distorted and haphazard living. The present ruthless wars and the hard-hearted animosity between and within nations impart to countless numbers a sense of helplessness. Yet we feel instinctively that we are equal to any event—that within ourselves there is a power to surmount any difficulty. Each of us must realize that in a position high above human beings is a Power that controls the destiny of us mortals on earth.

Let us turn to the Lord with faith in our hearts and a prayer on our lips. Let us learn that faith and prayer bring true happiness.

Life can be beautiful.

I congratulate the entire staff for the fine work they have done on this year book, *The Modulus*. It is truly representative of Tri-State College.

I want to express gratitude and appreciation for the cooperation I have received from individual committees, our faculty advisor, and the entire Class of 1941 in planning and working out our Senior Class program for this year. Moreover, I wish, in behalf of this year's graduating class, to thank the faculty for the fine education they have given us. Certainly their liberal assistance to us has made it easier to acquire a thorough education.

Fellow graduates of the Class of 1941, thank you for the many friendships I have enjoyed among you.

The Institute of Aeronautical Sciences

The Institute of Aeronautical Sciences is a national organization of Aeronautical Engineers. It has as members some of the world's best and most famous pilots and engineers connected with aviation and its many professional fields. The institute publishes a journal designed to keep the members familiar with the developments and achievements in the aviation industry.

We have had a chapter of the institute at Tri-State for several years. This chapter holds a meeting weekly. At these meetings various talks, such as up-wind turns vs. down-wind turns, aircraft with rotational wings, etc., are given. These talks are given by the members of the institute and professors. We have a banquet every term, at which we have guest speakers from various fields of the aviation industry. This spring our guest speaker was an air hostess from the T. W. A. Airlines.

The institute also has a field trip to various points of interest every spring. On these trips we visit the various aircraft factories in this part of the country, the various large airports in this district, and many other points of interest.

The institute membership is not restricted to college students but is meant for the members of the practicing professional fields. After a member graduates from college he is given a technical membership for the profession. This entitles him to the Journal and any other publications put out by the institute.

So *come on* all you Aeronautical engineers, let's take the institute to the top of the world.

Chemical Engineering Society

Students taking chemical engineering at Tri-State have for many years foreseen the numerous advantages that can be derived when a common cause and interest are welded into a society of the caliber that our present society now possesses.

For many years the society functioned without any particular form of government and it was not until the fall of 1937 that a constitution was dawn up. Since then it has been amended as discrepancies have appeared and at the present time the society is conducted according to a very well developed set of specific principles.

The chemical engineering society is relatively small because of the enrollment of chemical engineers in school, but the spirit of the members makes it one of vitality and efficiency.

Meetings are bi-weekly and at each meeting our president and secretary endeavor to have as speakers, men directly from the engineering field who are in regular contact with the problems that future chemical engineers will eventually face. For meetings when a speaker cannot be obtained, the society usually secures educational motion pictures.

Each term's activities are climaxed by a banquet and during the spring term as many men as possible attend the society's organized field trip. This field trip has as its primary purpose the study of actual processes and condition in the engineering field. Another very important purpose is to promote good fellowship and better understanding among its members. The field trip this year was down to Indianapolis. The society was invited to the state convention of the American Chemical Society which took place April 25th and 26th.

The society enjoyed a very successful year which can be attributed to the whole-hearted support of the members.

The chemical society wishes at this time to extend congratulations and best wishes to all of its members and friends who are graduating.

They will be Chemical Engineers

Civil Engineering Society

478043

Another eventful and entirely successful year has been thoroughly enjoyed by the Civil Engineering Society. Much pleasure as well as benefit has been derived by members, and on many occasions fellow engineering students, from association with the society.

Meetings for the fall term of 1940 were conducted by Omer Kronenwetter, president; Richard Firth, secretary; and C. W. McAlhany, treasurer.

One of the highlights of the term was a combination inspection tour and final banquet held in Fort Wayne prior to the last week of the term. It was a new idea and proved to be very successful.

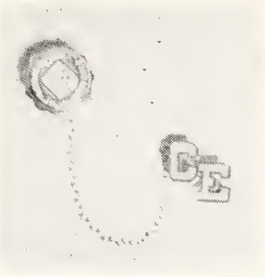
During the winter term of 1941 the society functioned very smoothly under the leadership of the following officers: President, Al Lange; secretary, Don Bell; treasurer, Kenneth Ing.

Mr. Ing rates a generous vote of thanks from the society for his unselfish devotion to the organization and the offices to which he has been elected. He has been a very worthy member for nine consecutive terms.

Mr. Lange in performing his duties as president endowed the society with a great amount of inspiration by promoting fine entertainment. Two motion pictures were courteously submitted for use by the Bethlehem Steel Company. One of these illustrated the process followed in the production of steel, and the other was of the construction of Golden Gate Bridge in California, one of the greatest suspension bridges in the world. These, as may be readily understood, were of great interest as well as instructive. Mr. Lange was also very successful in obtaining prominent and interesting speakers, one of these being V. J. Brown, chairman of the American Road Builders Association, and publishing director of "Roads and Streets" magazine, whose topic was "Roads for Defense."

The final banquet was held at the Y. M. C. A. in Fort Wayne with thirty-one present. It was a great

In the field of Civil Engineering



OFFICERS

Al Lange, *President*

Don Bell, *Vice-President*

Ken Ing, *Treasurer*

success and will be long remembered by those present.

Officers elected for the spring term were Ernest Thompson, president; Vincent Butler, secretary; and Victor Snapp, treasurer. All of these men are members in good standing.

In concluding this brief annual sketch of our activities we wish to impress upon the minds of our present members and prospective new members that the continual success and strength of the society depends upon their loyalty and complete co-operation.

It is a known fact that an organization endows each of its individual members with strength, confidence and the ability to work with his fellow men. These are the tools necessary for complete success and no better time may be had for obtaining them than while in school acquiring the other essentials necessary to the preparation for a chosen profession.

After classes

Electrical Engineering Society

Primarily, the purpose of the Electrical Engineering Society is to benefit and aid the students. This benefit is derived through many channels, prominent among them being the opportunity of meeting men from the industry, who are brought in by the society. Conversation with such men is always valued by the ambitious student. Splendid opportunities for practice in public speaking are afforded throughout the course of the weekly meeting. Similarly, experience in executive duties may be gained by holding an office in the organization. Through the inspection trips sponsored by the society a broader conception of Electrical Engineering may be gained.

These are but a few of the numerous benefits open to members of the society. These, in conjunction with the many others, combine to form a broadening influence which the electrical student cannot afford to overlook.

A short resume of the past year's work will facilitate a fuller appreciation of the society's activities.

On October 16, 1934, a group of electrical students met in the Engineering Building for the purpose of becoming organized, and about this group as a nucleus, the Electrical Engineering Society of Tri-State College was formed.

During the past year the society has functioned successfully, fulfilling the object of its foundation by bringing its members in contact with many technical men in the field of engineering. The schedule of activities was completed by a field trip and banquet under the capable leadership of Mr. Cochran, president of the society.

Radio Engineering Society

The Radio Engineering Society was founded for the purpose of uniting the Radio Engineering students among themselves as well as to acquaint them with the industrial world outside the college walls. This is accomplished by having outstanding men in the field of radio here to speak to the students. From these men we learn to correlate what we have gained from text books to that of actual practice in the field. It makes one on the alert to the subject matter that should be stressed in our course of study. The outside speakers sometimes bring slides or movies to illustrate their talk. Throughout the quarter we have one or two social meetings where we have refreshments and discuss the plans of the yearly event of the field trip. The field trip is held during the spring term.

The Radio Engineering Society holds radio license W9PMZ.

As a special mention of appreciation, the society is indeed grateful to Professor Leland S. Ax, who as faculty adviser, has given time and experience in our behalf. His organization of the yearly field trip is the event of the school year for many of the radio students. The Radio Engineering Society is happy to know that he is with us.

Mechanical Engineering Society

Through the ages, since the conception of man, there has been a guiding spirit which has brought men of kindred ideas together. Since the first stone-age man discovered that by tying a leathern thong to a wooden handle and attaching a stone head he had an axe, went forth into the forest and met in it another stone-age man similarly equipped men could not afford to be enemies. Thus came about the first society.

It was only natural that men of that caliber, displaying early in the existence of the world an advanced mentality and knowledge of the sciences, should bond together in fraternal organizations of one sort or another.

As the human race advanced, the axe developed into the sledge; then later came the crow-bar. The crow-bar was in turn followed by the shovel and thus came civil engineering and its allied branches. The application of simple mechanics to crow-bar and shovel, and the evolution of the wheel brought about the beginnings of Mechanical Engineering. From these small beginnings grew the sciences of today.

Down through the ages following the development of the sciences came the inclination of like professions to band together, thus forming the beginning of societies as we know them today.

From this analogy it may be seen that a Society is, without a doubt, one of the earliest organizations known to man. The Tri-State Mechanical Engineering Society is no exception to this rule. However, do not think for one moment that this society creaks with antiquity. On the contrary, its youth, its modern outlook, and its swift advancement is assured by its election of officers every term and an influx of new members. This society proves its far-reaching outlook by its acquisition of men prominent in industry and in close contact with present-day problems who have contributed much as speakers for its meetings and its widely famed banquets.

Sigma Epsilon Society

The Sigma Epsilon Society of Tri-State College was organized in 1933. The purpose of the society is to sponsor organized activities among the students of the School of Commerce.

Under the leadership of Robert Horton, the fall term activities consisted of a picnic, a lecture by Joseph Kolb, a Babson Institute graduate, and a successful banquet.

During the winter term toboggan parties, held at the Pokagon State Park, were the season's highlight.

The spring term has a gala array of social and scholastic activities scheduled. Some of the outstanding events will be a field trip to Chicago and Detroit, a spring tea dance at Potawatomi Inn, and winding up the affairs of the society at the annual banquet. Under the guidance of President Jack Ellison a most successful term is anticipated.

Fall term: Robert Horton, president; Richard Singer, vice-president; Kenneth G. Chandler, secretary; Steve Seculla, treasurer; Jack M. Ellison, Student Council.

Winter term: Richard Singer, president; Jack M. Ellison, vice-president; Kenneth G. Chandler, secretary; Ivy Shankle, treasurer; Carl Evans, Student Council.

Spring term: Jack M. Ellison, president; Mason Bliss, vice-president; Miss Verna Wilson, secretary; Jack Facemire, treasurer; Kenneth G. Chandler, Student Council.

Inter-Fraternity Council

The Inter-Fraternity Council was organized to promote good will and fellowship among the fraternities; a fraternity of fraternities we might say.

Representatives of each fraternity on the campus meet once every week to plan and direct activities that will benefit their chapters. Operating with the good will of the faculty, social functions and athletic contests are sponsored by the council. These diversions are necessary to maintain a healthy and sound mind and therefore go a long way in making better students. These men act with the guidance and suggestions of their chapters, still credit must go to them for their leadership and energy in supervising all affairs of the council.

The Inter-Fraternity Council has grown to be one of the most effective organizations on the campus which is a good indication that its members have been well qualified.

Not only the members but also many others look upon the Inter-Fraternity Council with respect and admiration.

Charles Oliver proved himself such a popular and capable officer that he held the office of President of the council for three consecutive terms. All Fraternity men owe him a vote of thanks for his fine handling of the council during the past year.

Alpha Gamma Omega

Harold Francis, an outstanding student at Tri-State College, believing that the Catholic students should be organized, took it upon himself to do the job. After many weeks of hard work, he brought together twenty Catholic students, outlined his plans, and thus Alpha Gamma Omega Fraternity was founded on January 8, 1938.

A local Fraternity, Alpha Gamma Omega, met with dauntless fear the hardships encountered by any new organization. It progressed rather slowly at first, but with a true determination to drive forward, it made many achievements by the time of its first anniversary. The Fraternity had, at first, held its meetings in Newman Hall, but in March 1940 located itself on Prospect Street. With magnificent cooperation and an increase in prestige, the Fraternity moved to a better location, and into a much larger house, in the spring of the following year. Here at its present location, it has grown into one of the outstanding Fraternities on the campus.

Alpha Gamma Omega promotes good fellowship among its members, provides a means for social entertainment, aids its members in practicing their religion and participates in all Inter-Fraternity activities. The Fraternity has proven itself to be outstanding by winning the basketball and football trophies this past season.

In order to share the full rights and benefits of membership in Alpha Gamma Omega, each member must maintain a high scholastic average. This assures the Fraternity greater strength and infallibility.

An important date in the future, is the Fraternity reunion, which will be held at Angola in 1943. We encourage all members to attend. To the old members graduating this term, Alpha Gamma Omega wishes great success in their field of endeavor.

Alpha Kappa Pi

The Alpha Beta chapter of Alpha Kappa Pi, as it is today, is the descendant of two parent organizations. The first of these Phi Lamba Tau, was established on the campus in nineteen hundred and twenty-five. Four years later a petition was presented to the officers and personnel of a national social fraternity of high standing, and the following year Phi Lambda Tau became the Eta chapter of Alpha Delta Alpha. This organization was dissolved in nineteen hundred and thirty-five. Following the dissolution the fraternity became associated with Alpha Kappa Pi, a fraternity having over three thousand members and a senior membership in the National Inter-Fraternity Conference.

Alpha Kappa Pi, through the initiative and foresight of its leaders and members, has taken a position among the more progressive national fraternities in this country. Many times throughout the year we are called upon for the approval of the admittance of new chapters. By virtue of this, the ambitions of present and future members, our fraternity will continue to prosper and grow larger and will assume its place beside the fraternities whose membership may be greater.

Alpha Lambda Tau

Alpha Lambda Tau was founded at Oglethorpe University in 1916. It was the first fraternal organization at that institution following its reorganization in the same year. Originally formed as the Alpha Lambda Club, it was later decided that the fraternity should become a national order, and was incorporated under the laws of the State of Georgia, as Alpha Lambda Tau.

There was at first an idea that the fraternity would never go north of the Mason-Dixie line, but this was disapproved in the 1927 national convention, at which time a charter was granted to a group at the University of Illinois. During the past few years, the fraternity has installed chapters in Maryland, Missouri, Colorado and here in Indiana. There are now 21 active chapters and three alumni chapters, the latter being located in Chicago, Birmingham and Atlanta.

Psi Chapter was installed at Tri-State College on June 7, 1936, after a successful petition by the Sigma Mu Sigma National Fraternity, which desired to expand into a larger national organization.

A fraternal organization must, in order to be successful, have the complete cooperation of all members. Psi of Alpha Lambda Tau was fortunate to have a foundation consisting of men that realized this fact and adhered closely to it. Down through the years, the portals of Psi have welcomed men of outstanding character, scholastic ability, athletic prowess and perseverance. Through their efforts the fraternity has risen to the heights of prominence among organizations on the campus of Tri-State College.

We, of the graduating class leave Tri-State College with the knowledge that capable hands are controlling the destinies of Alpha Lambda Tau. Fraternal life has imparted to us memories that will long be cherished, friendships that are priceless, and a deeper understanding of one's fellow man. If one were to take the following ingredients: brotherhood, self-sacrifice, co-operation, and a dash of humor, mix well and combine them in a group of fifty young men, the result would be PSI of Alpha Lambda Tau.

Beta Phi Theta

Beta Phi Theta Fraternity was founded at the Milwaukee State Normal School in November, 1917. It was the first social fraternity at the normal school. During the first successive years it flourished as a local organization. In 1923, plans were made for expansion, and when the first national convention was held in June, 1924, three chapters responded to the roll call. Since that time other strong local fraternities have become affiliated with Beta Phi Theta.

The history of the Delta Chapter of Beta Phi Theta dates back to 1922. At that time, a group of young men organized "The Four Eleven Gang," their purpose being the promotion of good fellowship. The organization became so successful that they decided to expand in order to afford other students the opportunity of enjoying this relationship. It was at this time that Lambda Phi Epsilon was born. The membership of this fraternity grew, and recognizing one of the great needs of the students, opened the first fraternity house at Tri-State in 1925. In 1929, when the college recognized fraternities, the members of Lambda Phi Epsilon realized the advantages of national membership, and became Delta Chapter of the Beta Phi Theta Fraternity.

Delta Chapter, now in its twelfth year of existence at Tri-State, has never lost sight of its ideals of its founders. Those chosen for brotherhood are men who have shown courage, initiative, and fortitude before our eyes. This policy of selection has insured lasting life and leadership for our fraternity. The list of brothers, past and present, who have attained leadership in activities and scholarship proves the worth of this policy.

Phi Sigma Chi

The Phi Sigma Chi Fraternity was founded in Zanesville, Ohio, on November 28, 1901. Upon organization, it was known as Delta Theta Omega but in May, 1902, with reorganization and revision of constitution and ritual, the name Phi Sigma Chi was adopted. Due to the whole-hearted support of its members in numerous activities, the organization has grown to such an extent that it now boasts 68 chapters.

In the fall of 1927, the Delta Epsilon of Tri-State College was organized and admitted to the portals of Phi Sigma Chi Fraternity. Excepting a year absence while connected with another national organization, the chapter has remained on the Phi Sigma Chi roster through the succeeding years.

Being a fraternity man is a distinction on any campus yet many non-fraternity men believe that pledgeship to a fraternity is just an opportunity for the members to take advantage of a pledge, to show superiority. These thoughts are quite radical for even though the actions of a pledge may verge on the brink of foolishness at times, his actions tend to promote sportsmanship, determination, control and strengthen his ability to take orders, all very valuable assets to any college man.

The Greek letter men have long ago proven themselves an integral part of college life, employing friendship and brotherhood as outstanding basic principles. Intimate fellowship with your fellow man is enjoyed to the utmost and nothing has surpassed the benefits, not only derived, but rendered, by a true fraternity man. The close cooperation required for a successful chapter in business, in sports, in social functions, and in scholastic work binds each member more closely than ordinary acquaintanceship could ever hope for. After experiencing membership in a fraternity, we all consider the time, the effort, and the money involved as an excellent investment.

The outstanding events of Phi Sigma Chi in the future are the national convention to be held in Philadelphia, Pa., in August, 1941, and Delta Epsilon's own spring festival and reunion at Kendallville, Ind., June 7, 1941. The latter event is an annual affair with Delta Epsilon and promises a success even greater than that witnessed in the past.

To our graduating brothers, our brothers who have gone, and those leaving for other reasons, we extend our heartiest congratulations, wishing them all the success they deserve. And may we see them all together again on June 7.

Phi Iota Alpha

This organization was first established on the Tri-State campus in the year 1921, under the name of Club Hispano-Americano, for students from Spanish America. Six years later, it was legally instituted under the laws of the State of Indiana as the Alpha Chapter of Gamma Eta Alpha Fraternity.

Through an intensive campaign of unification the Gamma Eta Alpha successfully united with the Phi Lambda Alpha Fraternity and became its Eta Chapter. The driving force that brought about this union was the similarity of ideals that these two organizations held toward Latin-American consolidation. Then uniting our efforts with theirs we kept up our campaign to spread the formation of new Chapters over the southern universities. This activity culminated during the annual convention held on December 26, 1931, in Troy, N. Y., where the Phi Lambda Alpha merged with the Sigma Iota, another strong Spanish organization with chapters in the south, to form the present Phi Iota Alpha Fraternity, of which we are the Iota Chapter.

At present we are the strongest Spanish organization in the United States, with ten well organized chapters and several new prospects. Our fraternity does not only comprises the United States but it also includes every Latin American country, each one representing a zone, and the various zones in a body make up the Latin American Union.

Our aims are, besides fostering among our members a better sense of duty and study, to create that Latin atmosphere which is an integral part of our far away homes, and to prepare our members to carry out in the future that great ideal, ultimate goal: "The political, social and economical union of all Latin American countries."

Iota chapter

Sigma Mu Sigma

Alpha Chapter, Sigma Mu Sigma, was founded at Tri-State College on Good Friday, March 25, 1921, by three students of Masonic affiliation who saw the fine possibilities in store for the furtherance of true Masonic Fraternalism. With the aid and combined enthusiasm of nine other Masons, who were also students on the campus, this chapter was duly formed. In 1924 this and other chapters of Sigma Mu Sigma were chartered as a National Fraternity and became a member of the Inter-fraternity Council. After twelve years of successful endeavor, through powers beyond their control, Alpha Chapter, Sigma Mu Sigma, along with all other chapters, except Iota, were forced to become inactive. In 1940 Alpha Chapter, under the efforts of loyal alumni members, was re-formed. In the same year, this chapter joined the present Inter-fraternity Council. Since that time Alpha Chapter has enjoyed a very successful career. Once again there is a Masonic Fraternity for the furtherance of true Masonic Fraternalism on the campus of Tri-State College.

The aim and function of Sigma Mu Sigma on the college campus is to create a well balanced college fraternity. It is based on scholarship and aims to develop the intellectual side, for good scholarship is largely a matter of interest and application. Good fellowship is sponsored at all times, and membership requirements are very high.

"Membership in a fraternity is a concentrated experience in human association."

Student Council

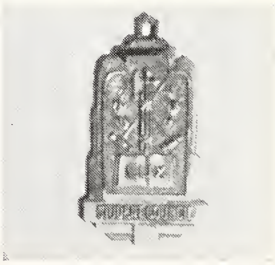
The purpose of the Student Council is to promote a representative student government of all the societies and fraternities on the campus.

This body is composed of a senior and junior member from each organization represented. It is this group that plans and sponsors such intra-mural sports as exist on the campus. They also elect the editor of the *Modulus* and conduct the senior class election.

Several attempts have been made in the past years to organize an effective Student Council but because of an unwieldy constitution and poor leadership the body received no support or cooperation from the students.

In the fall of this year the constitution was rewritten and under the leadership of Al Lange began a new and more useful regime on the campus. This council brings about a closer relationship between the different societies and the fraternities.

Our stay in school is altogether too short to spend time over hard feelings. Congratulations are then in order for the Student Council of 1941 and its officers for laying the foundation for a better and more respected organization in the future.



Alpha Beta Alpha

Robert Horton, *President*
Ivey Shankle, *Treasurer*
J. Pielick, *Vice-President*

This Honorary Society, which was founded in September, 1938, was created to award outstanding scholarship among the students in the School of Commerce of Tri-State College.

Commerce has always entered into every phase of our natural existence, from ancient times down to the modern day. Business has seen the rise and fall of governments, has witnessed internal strife, and has been a very important factor in the moulding of nations. In this modern business age there is a great demand for men of patience, integrity, and initiative—in short, the type of men who uphold the ideals of Alpha Beta Alpha.

Under the grateful guidance of Professors H. R. Hoolihan and H. W. Hoolihan, the society serves to help its members maintain their scholastic standing and also to encourage future members to pursue their studies with greater diligence and perserverance.

To be eligible for election to Alpha Beta Alpha, a student must be registered in the School of Commerce and pursuing a course qualifying for the Bachelor of Science Degree. The student is required to maintain an average grade of 92 or better for the preceding four terms prior to his election. At the beginning of each term a list of eligible candidates is submitted to the society, and the four candidates with the highest scholastic standing are elected to membership.

Among the students of the School of Commerce the Alpha Beta Alpha Society stands for the ideal in campus organizations; brotherhood and friendship, a well balanced social program, and the maintenance of high scholastic records.

OFFICERS

R. Magri, *Secretary*
R. Chapin, *President*
R. Englehardt, *Treasurer*

There are always men who have the determination, desire and ability that gives them distinction in their own field. This achievement brings great personal pride and gratification. However, recognition of such an accomplishment increases its reward a thousandfold. Chi Epsilon was founded in 1929 as a means of giving this recognition to Chemical Engineering students who by evidence of their work show themselves to be worthy of this honor.

The fraternity also serves to bring about a closer relationship between these students who have shown a deep interest in chemistry. By limiting the membership to fifteen, it has created a competitive spirit, and in turn raised the standard of scholarship to its present level.

Membership in the fraternity shows not only tangible evidence of excellence in one's work, but also a personal honesty, at times not wholly apparent in classes.

The fraternity is indeed fortunate in having as advisor, Professor Gerald Moore, honorary president, and head of the Chemical Engineering Department His valuable advice is truly appreciated by Chi Epsilon. The other honorary members include Professors Slanina, MacFerrin and Newnam.

The responsibility to the purposes and reputation of the fraternity automatically falls upon the shoulders of each member. May we never fail to fulfill the duties and trust that the fraternity has placed in us.

Tau Sigma Eta

Honorary Engineering Fraternity

Scholastically, Tau Sigma Eta represents the highest pinnacle to which the engineering student at Tri-State may aspire.

Tau Sigma Eta Honorary Engineering Fraternity was founded in January, 1930, by the Engineering Society of Tri-State College. Election to membership was to be a reward for outstanding scholarship among Tri-State engineering students. In April, 1930, a charter was granted to the fraternity by the state of Indiana, thus permitting Tau Sigma Eta to function as a local collegiate honor fraternity.

Membership in the fraternity is limited to those students capable of meeting its rigid standards. To become eligible for membership a student must be registered in the College of Engineering, he must have carried a minimum of twenty class hours per week, and he must have had an average grade of B or better for four terms or an average grade of A for three terms.

At the beginning of each term a list of students that are eligible for membership is submitted to the fraternity and from this list a maximum of seven is elected for membership. Once elected to membership in Tau Sigma Eta it is necessary to maintain the same high scholastic standing in order to keep this privilege.

Tau Sigma Eta stands for the ideal in campus organization; brotherhood and friendship, a well balanced social program, and the maintenance of high scholastic records.

Rho Epsilon

Rho Epsilon, Eta Chapter, took root on the campus of Tri-State College, March, 1938. Although one of the newest fraternities on the campus it has made remarkable achievements in the field of amateur radio. Rho Epsilon is an honor society, having for its purpose the encouragement of experimental radio activity. Any truly great organization must have some firm foundation upon which to grow, hence the motto *Crescat Scientia,* meaning "May Knowledge Increase."

In an effort to comply with our high standards, we are endeavoring to make great studies in the high frequency field. At the present time the ultra-highs are not satisfactory for constant long distance communications but with experimentations along this line, we have hopes of introducing new equipment that will tend to stabilize this portion of the radio spectrum.

To be eligible for active membership, a Class B amateur operator's license or better, exclusive of any commercial operator's license, must be possessed by the applicant and an average of C or better in scholarship must be attained.

Modulus Staff

This book, issued annually, portrays the life of the students of Tri-State. Campus and school scenes, organizations, societies, activities and experiences represent college life, and college life in later years become one's fondest memories. It is with this thought in mind that the *Modulus* is published.

This year more than ever, the *Modulus* is a product of the student body since more of the work was done by the staff than probably has been done by the staffs in past years. This is true especially of the photography, the greater percent of which is student work.

During the few months in which this staff operates, the complete year book is organized, edited and published. It is also the duty of the staff to secure financial assistance and to market the book.

While most of the members of the staff were inexperienced in this line of work, with the aid of faculty advice and past procedure, they soon learned their jobs and so during the course of the year, accumulated knowledge and experience that should be of great value to them in later years.

Kismet, Student Publication

The Kismet in 1941 attempted to find out what the students wanted in their publication. We found there were two factions, those who wanted a technical paper, and those who wanted a paper of a more flippant character. Like the fool who didn't know it was impossible and went ahead and did it, we have tried it, we have tried to steer a middle course and attempt to satisfy everybody.

For human interest we have had Vox Studentis, a column in which we have attempted to get geographical cross sections of student opinion on vital questions of the day, both on and off the campus.

The technical side was supplied in a good part by members of the faculty who wrote articles on industrial problems and who were well qualified to pass an opinion again of their experience in the field. This coupled with President Handy's comments on timely topics gave the paper an added touch of dignity and formed a publication which we can say in a modest way we enjoyed making for you.

Miss Margaret Yoder is an associate Dramatic Club member, and is active in the Alumni Players. Miss Yoder has played "Olivia" in "Twelfth Night," "Titania" in "Midsummer Night's Dream," "Celia" in "As You Like It" and is shown here as "Nerissa" in "The Merchant of Venice."

At present Miss Yoder is teaching art and dramatics at Galadet College in Washington, D. C. She is, needless to say, most successful in her work.

Top row (reading from left to right): Richard Myers, Leland Schoff, Dixon Waite, John Stange.

Second row: Jubert Malouf, Gene Richards, Charles McKesson, Rex Davis, Burr Jackson.

Third row: Professor Charles Shank, director; James Andrews, Roger Schindler, William Cannon, Meldon Caswell, Donald Graybill, Professor Minard Rose.

Fourth row: William Harrington, Robert Horton, Edward Burke, Gene Gillum, Harold Thompson, Earl Wolf, Joseph Arnold.

William Taylor, Robert Reinking, Gene Pucci and Don Kensinger not in picture.

President Handy, Professor Alice Parrott and Professor George Niehous, honorary members.

College Dramatics

Although dramatics as such have always flourished on our campus, the Tri-State College Dramatic Club, as an organization, had its inception on the campus in 1930 and celebrated its tenth anniversary with a three-day Drama Festival in May this year. A Marionette show operated and created by club members, a performance of the old English farce comedy, "Gammer Gurton's Needle," and a unique history of the club by members made up the first day's offering, followed by the annual Dramatic Club Dinner Dance at the State Park Inn. A recital by Cornelia Otis Skinner climaxed the festival. The senior play, "What a Life," will be produced in June. At Easter Chapel the one-act play, "The Other Apostles," was presented. The Dramatic Club proves its worth and reason for existence by adequately producing the best of collegiate drama. Alpha Psi Omega, national honorary dramatic fraternity, has been actively functioning for four years on our campus with Robert Horton as president.

Scenes Well Played

The annual Christmas Chapel play was a new and interesting project this year, and drew the largest student and town audience ever assembled in the auditorium. "The Toy Shop" by Wilde was produced by the club for the children of the community, but parents and friends were interested to such a degree that seats were placed back scenes.

A few of the dolls that came to life are shown on the bargain counter stage.

"You Can't Take It With You" was the Dramatic Club's project play this year. It was most successful and a neat sum realized. Our associate members, the Misses Gloria Aldrich, Emagene Hendershot, Louise Helme, Julia Jane Jackson, Virginia Care and Mrs. Lucille Emerson with Velma Triblett worked valiantly and shared the laurels earned. The new club sweaters, blue with yellow increment, were officially worn by Ushers Myers, Taylor, Kensinger, Canon, Pucci, Waite, Malouf, Jackson, Graybill and Andrews. Professor Shank directed. Edward Burke handled the publicity and William Cannon was business manager. Dixon Waite had the lights and Meldon Caswell was in charge of the stage with Robert Horton on properties. A difficult play well done!

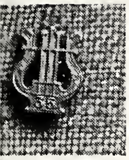
College

Glee Club



The Tri-State College Glee Club was organized in the fall of 1930 by the Board of Directors and is still sponsored by that body. Membership in the Glee Club is open to all students who can qualify. The first year this number was small, numbering twelve or thirteen. The club has steadily grown in membership and ability until the present time. The club now boasts a male chorus of about twenty-five and a girls' chorus of about eleven or twelve.

The Glee Club is in constant demand for concerts in and around the school. During the year they have sung several times over WOWO, the Westinghouse station, in Fort Wayne, Indiana.

Because of the intensity of the courses at this school it is difficult to find time for many extra-curricular activities. A great deal of credit is therefore due these men and women for devoting part of their free time to the Glee Club. They bring much pleasure and credit to the school.

Professor Harshman, in directing this club, demonstrates not only his ability as a musician but also as an organizer. We, of the student body, thank Professor Harshman and the members for the Glee Club.

College

Music plays an important part in everyone's life whether he is a musician or just a listener. People at parties dance to music; people at home listen to music; soldiers at war march to music. Everywhere and in every walk of life music is used to help forget the worries of the world and to make everything bright.

In December, 1938, a group of music lovers gathered to form a band to give the students of Tri-State College music for their activities. The constitution was drawn up, officers elected, music and instruments purchased and the band swung into full stride.

At the close of the second year, we find the band one of the finest organizations on the campus. No home basktball game was played without the band to play and yell for the team. The band also helped the student council put the pep sessions over by furnishing music for parades. Last but not least was the trip to Olivet, Mich., to help spur the team on by furnishing music and cheers for them.

Today, Tri-State College Band is one of the few organizations on the campus whose members are given letters by the school as an award for their work. Orchids aren't enough for Professor Harshman, who helped the band reach the place it is today.

The Canadian Club

Since the Canadian Club of Tri-State College was founded in January 1937, it has been an active organization on the campus. The aims of the club are: to help Canadian students in their common interests, both socially and scholastically, to bring about a better understanding with our American neighbors, something very necessary in these troubled times, and to uphold the constitution of the club. The club is very appreciative of the support it has received from the college and the city, and has won for itself a fine standing among the other organizations on the campus.

All Canadian students are elibible for membership, and are urged to give their whole-hearted support to the advancement of the club. At the end of three consecutive terms of membership an attractive shingle is given to each member.

Meetings are held every two weeks during each term. These assemblies take the form of business meetings, and social gatherings. The club does not tolerate political or sectarian differences so that discussions are more freely carried on and a fuller knowledge of the matter obtained without personal difference being a handicap.

The Canadian Club of Tri-State College is affiliated with the Association of the Canadian Clubs of Canada. This affiliation makes it possible for the association to select and send internationally known men to us for club banquets. It also gives the club members privileges in other Canadian Clubs throughout the continent and provides that members of the club automatically become members of the Canadian Club at home.

To the members of the graduating class of 1941 the Canadian Club extends its sincere congratulations and best wishes.

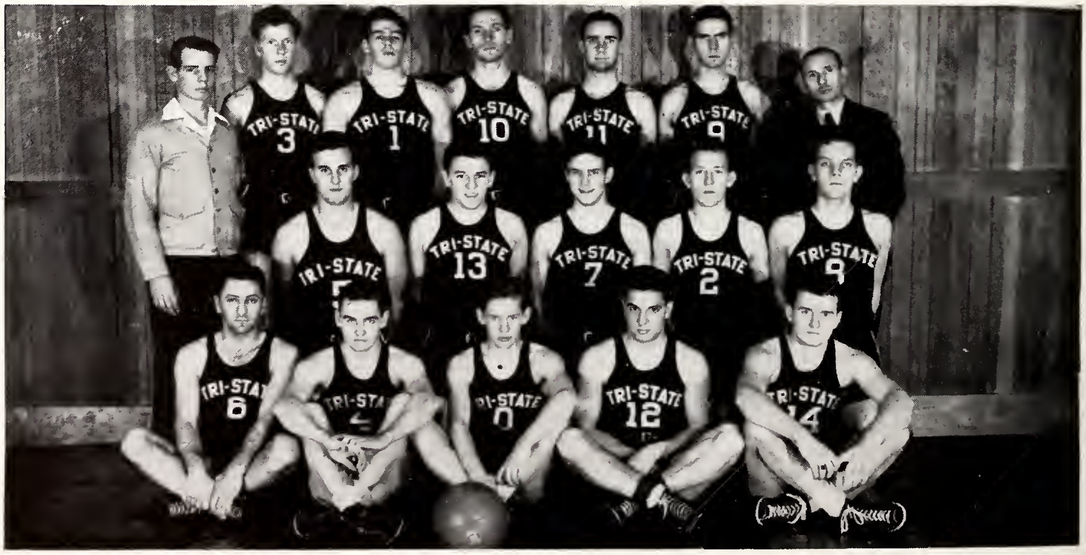
E. L. DRUCKAMILLER
Coach

Varsity Basketball

The season of 1940-41 was Tri-State's fourth year for basketball.

The team won seven games and lost eight in the toughest schedule ever played by a T-State squad. They played teams such as Toledo University, Notre Dame, Central State Teachers and many others which are rated as tops. One of the highlights of the season was the game with Notre Dame. This was a hard-fought game and every man on the team was in there giving his all. Milt Dvornay was awarded a trophy for making the highest percentage of foul shots.

Next season promises to be just as good, with a fine bunch of men returning, so let's every one get behind the team next year and really boost them.



BILL GAMBER

A trophy was awarded this year to the men considered by competent judges to be the most valuable man on the team. The factors considered in awarding this trophy were sportsmanship, scholarship and the player's attitude while on the floor.

Congratulations Bill Gamber for being chosen as the most valuable man on the team.

INDIANAPOLIS ENGRAVING COMPANY, INC.

INDECO GUIDES TO BETTER ANNUALS

STABILITY

Since the turn of the century the Indianapolis Engraving Company, Inc., has maintained the highest standards of quality and intelligent cooperation, thus accounting for the continuous use of our service by many high schools, colleges and universities.

QUALITY

Indeco quality is the finest that modern equipment and skilled craftsmen can produce. Every engraving is unconditionally guaranteed to be a perfect printing plate and to give a faithful reproduction of your engraving copy.

SPECIALIZATION

Our service includes help in planning and designing, suggestions on how to get the best pictorial effects, assistance in preparation of engraving copy, and solving the many problems arising in making your book both an editorial and financial success.

IDEAS

The latest ideas in yearbook construction are offered to make the annual best meet the requirements of your particular school. Our "Service Manual" is a complete guide for the staff in their work.

RESULTS

Indeco planned yearbooks have long been recognized as being among the outstanding annuals of the country. You will be agreeably surprised, too, at the purchasing power of your budget. Write us asking for a complete explanation of the Indeco plan.
